## Professional Summary

A results-oriented Technical Consultant with four years of experience contributing to the implementation of enterprise solutions (AdaptiveWork/Clarizen) for major companies across Latin America. Possessing a strong foundation in logic, programming, and project management, I am currently transitioning my career to Front-End Development. My goal is to leverage my analytical skills and passion for technology to build modern, responsive, and user-centric web applications. I am a self-taught, proactive professional with a proven ability to solve complex problems and a commitment to continuous learning and best practices in software development.

## Professional Experience

### TWRT – Project Consulting (Planview/Clarizen Partner)

*Technical Consultant & Clarizen (AdaptiveWork) Specialist* | Feb 2021 – Feb 2025

- Provided technical expertise and executed end-to-end implementations of AdaptiveWork (Clarizen) for a diverse portfolio of large-scale clients, including Alicorp, Grupo Gloria, Cempro, Dos Pinos, Bladex, Tereos EU, and Siemens.
- Collaborated closely with Project Managers, offering critical technical insights, proposing innovative solutions, and driving key implementation decisions from kickoff and requirements gathering to workflow automation, custom dashboard development, integrations, go-live, and post-implementation support.

- Successfully managed and delivered smaller, independent projects, demonstrating strong project execution and client management skills.
- Served as the primary technical reference for bug resolution and the development of complex automations, ensuring seamless system performance and client satisfaction.
- Conducted all project communications fluently in Portuguese, English, and Spanish, catering to a diverse range of international stakeholders.

## **Evoluservices**

*Development and Marketing Intern* | Sep 2019 – Apr 2020

- Developed and launched the company's institutional website and various landing pages.
  - Produced digital content and actively participated in the company's presence at CIOSP 2020, a major industry event.
  - Provided digital marketing support, including competitor analysis, banner creation, and image editing.
- 

## **Technical Skills**

- **Front-End Development:** HTML, CSS, JavaScript (Advanced), React.js (Continuous Learning), UI/UX Principles
  - **Back-End & CMS:** Node.js (Beginner), PHP, WordPress (Front-End and Institutional Websites)
  - **Project Management & Tools:** Clarizen (AdaptiveWork) Specialist, Workflow Automation, Dashboard Creation, Integrations, Git/GitHub, Linux (Basic), DevOps Concepts
  - **Languages:** Portuguese (Native), English (Fluent), Spanish (Fluent)
- 

## **Education**

**Universidade Presbiteriana Mackenzie**

*Bachelor's Degree in Computer Science* | 2015 – 2021

- Emphasis on Calculus, Linear Algebra, Programming, and Logic.

## **Alura**

### *Complete Front-End Course* | In Progress

- Comprehensive training in HTML, CSS, JavaScript, React, Node.js, UI/UX, and modern development best practices.
- 

## **Personal Projects**

### **Personal Portfolio Website**

- A dynamic and responsive online portfolio built with React, showcasing my projects and skills. The website features animated sections and a clean, modern design. [Personal Site](#)

### **Alura Projects – Front-End Training**

- A collection of practical projects developed as part of my Front-End training, demonstrating my skills in React, responsive UI design, and the application of development best practices.
